To Whom it May Concern,

I have 20 years of experience as a Project Manager/Director in IT. In my capacity as Director, Information Technology Projects for the Churchill Corporation I am responsible for implementation of all IT related projects. During the last 20 years I have worked with many PMs and only agreed to be a reference for 4. I have known Mr. Gary Palmer since April 2011 in the role of Project Manager (PM) for our SAP implementation vendor.

When our SAP vendor's PM resigned from the company, Mr. Palmer was proposed as a replacement. His many years' experience in managing SAP implementations was immediately evident and his ability to present options and alternative solutions was greatly appreciated. Mr. Palmer insistence on proper process and procedures was valuable in ensuring consistent quality deliverables in a fluid environment. He is pragmatic and dedicated to helping his client succeed and demonstrate high personal and professional integrity and perseverance in all tasks.

Therefore I highly recommend Mr. Palmer in the role of Project Manager for SAP related projects.

If you would like to further discuss my recommendation for Mr. Palmer I can be contacted directly at one of the numbers provided below or by email.

*Denis Chretien*

Sincerely,

Mr. Denis Chretien  
Director, Information Technology Projects
