Reference letter for Mr. Gary Palmer

From:

Guy Brassard
Business Unit IT Director
Guy.Brassard@Alcan.com

I have known Gary for 3 years as senior project advisor of our corporate SAP project organization. During this time he has continually demonstrated extensive leadership strategies, professional capability and specialist contribution toward a successful execution. Working with me on this project as senior advisor, he provided corporate management team, external quality assessment.

Gary worked well with the executive team clarifying and satisfying the various business requirements while leading his teams in the detailed execution of the project. His attention to detail, high standard of performance and continual tutelage along with mentorship exemplify his leadership technique and accomplishment.

As business partner, Gary also brought more specific benefits to Alcan Composites. Using his wide manufacturing knowledge, Gary helped us in performing a quality review of our CRM application, also helping in defining and aligning our Business Unit IT strategy toward the business strategic plan.

I can highly recommend Gary, he would be a valuable contributing member of your senior exec team contributing to your future success. I would encourage any reader of this reference letter to contact me directly for additional information or with any questions.

Sincerely.

A handwritten signature in blue ink, appearing to read "Guy Brassard".
